

The New BPS C^evo

Improved for Hyperefficiency

Working efficiently is the key to success, especially in small and medium-sized cash centers. The more efficient, the more successful. That's why we share the same goal as you: hyperefficiency

C^evo Efficiency

- Extensive processing options for user-tailored work experience
- Extremely flexible change of machine configuration through Config Optimizer
- Options, such as light signal, to guide users on operating the system

C^evo Security

- Resilient and stable Linux-based Software
- Enhanced IT security through encrypted communication protocols
- Intelligent automated processes, such as Header Card processing, limit operator interaction

C^evo Performance

- New High Performance Processor
- Best Singler independent from Substrate or quality
- Superior banknote transport

C^evo Reliability

- Easy-to-use interface to avoid operator mistakes
- Clear user guidance for any interaction needed
- Automated Software and currency update options ("Don't miss a counterfeit")
