CONVEGO® METAL

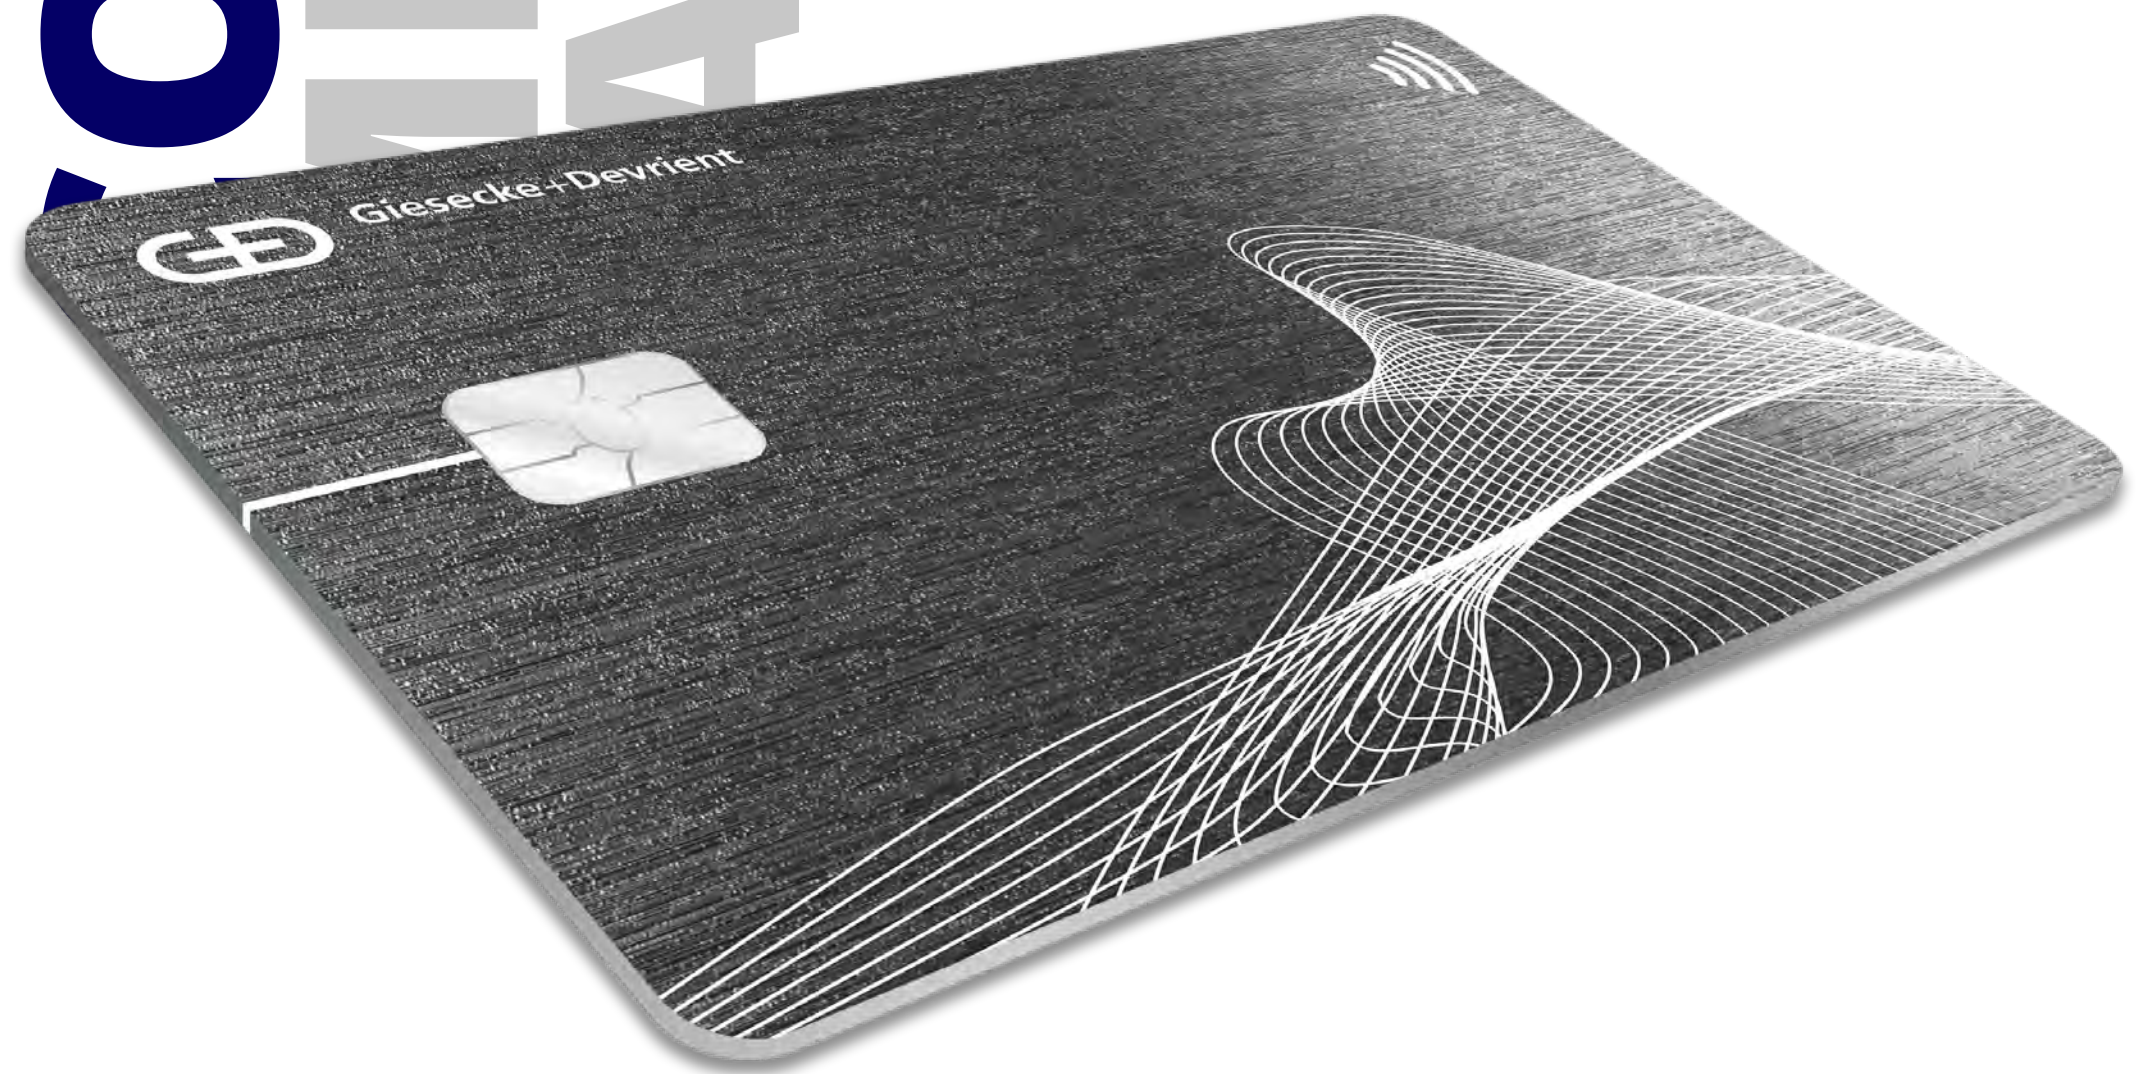

LIFESTYLE CARDS WITH A DIFFERENCE, FOR A MARKET READY TO GROW

The searing heat of a molten forge. The sun-like gleam of a precious ingot. The intricate beauty of a bullion coin. For thousands of years, people have associated metal with value. It embodies unique technological, craftsman-like and artistic qualities: concepts that cross cultures.

FACE **FACE LITE** **CORE** **ENCASED**

01 A WELL DESERVED SENSE OF ACHIEVEMENT

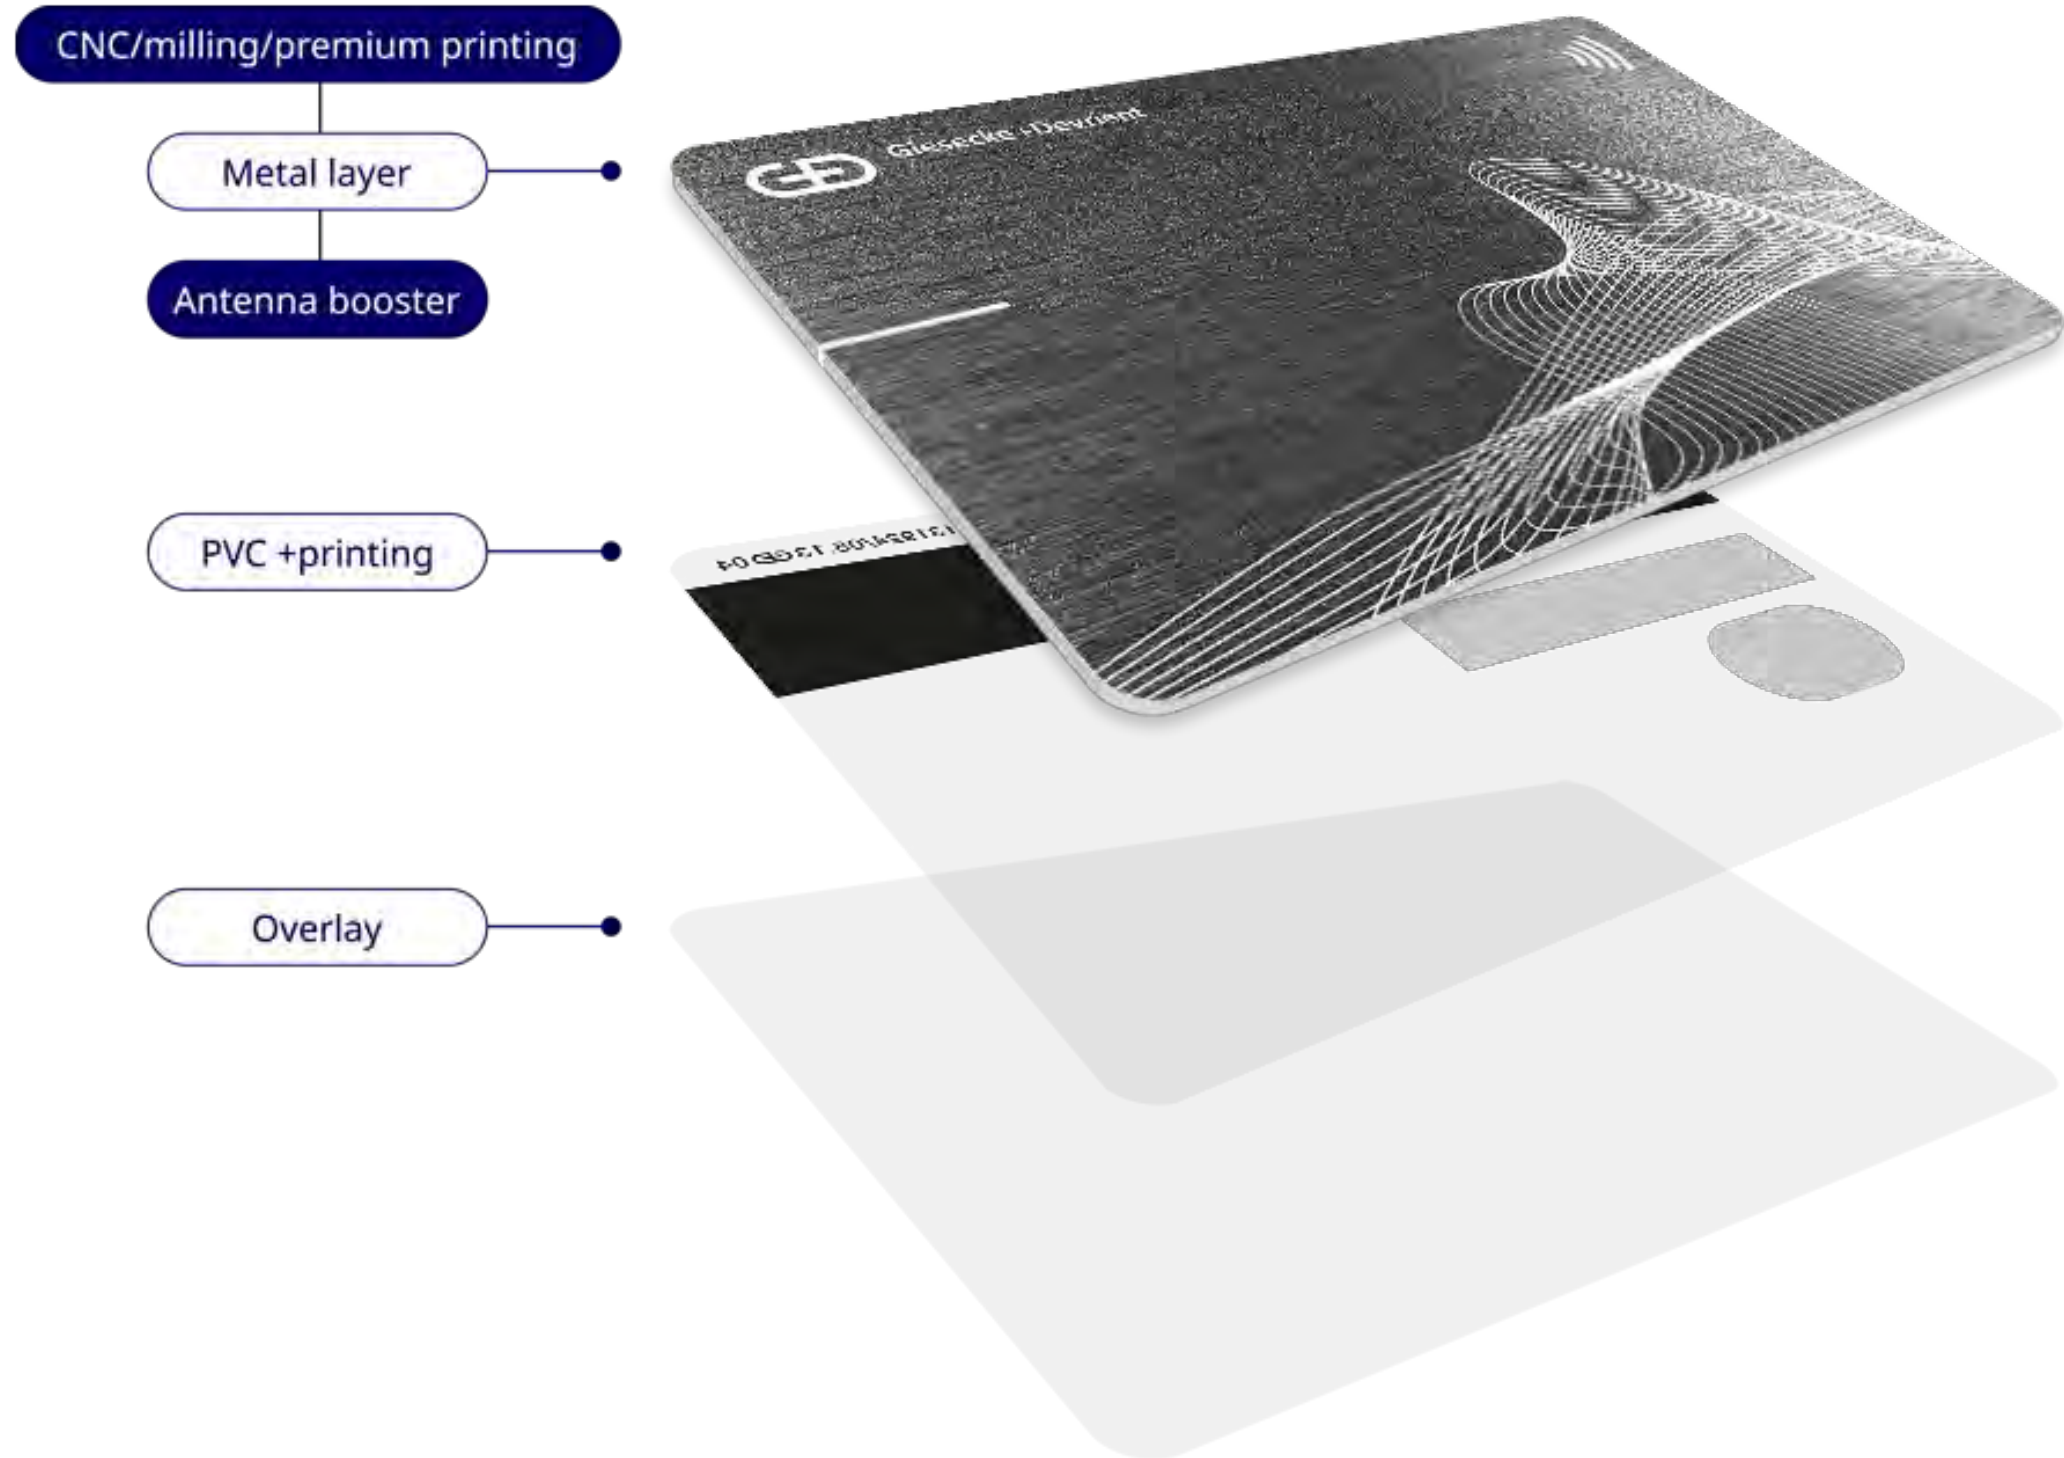

At **22 g** Metal Face is the heaviest card in the G+D metal cards portfolio, exuding a comforting sense of unmatched prestige and quality.

MONVEG
METAL
FACE

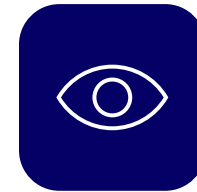

02 ABOUT METAL FACE

This heavyweight card tips the scale at **22 g** of stainless steel, with the metal surface exposed: without a PVC top layer and no overlay clouding the tactile experience, the feeling is pure and unique. The surface can be laser-etched or CNC engraved, with silk screening providing additional dramatic colour options.

03 DESIGN AND PERSONALISATION

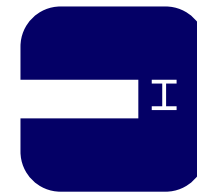

While metal cards are no longer solely for the upper income groups, the target customer for Metal Face tends to be successful financially as well as professionally. This makes them the highest-spending consumers and the most prestigious customers for a premium card.

01 AN ARTISTIC SIGNATURE TO MAKE YOUR MARK

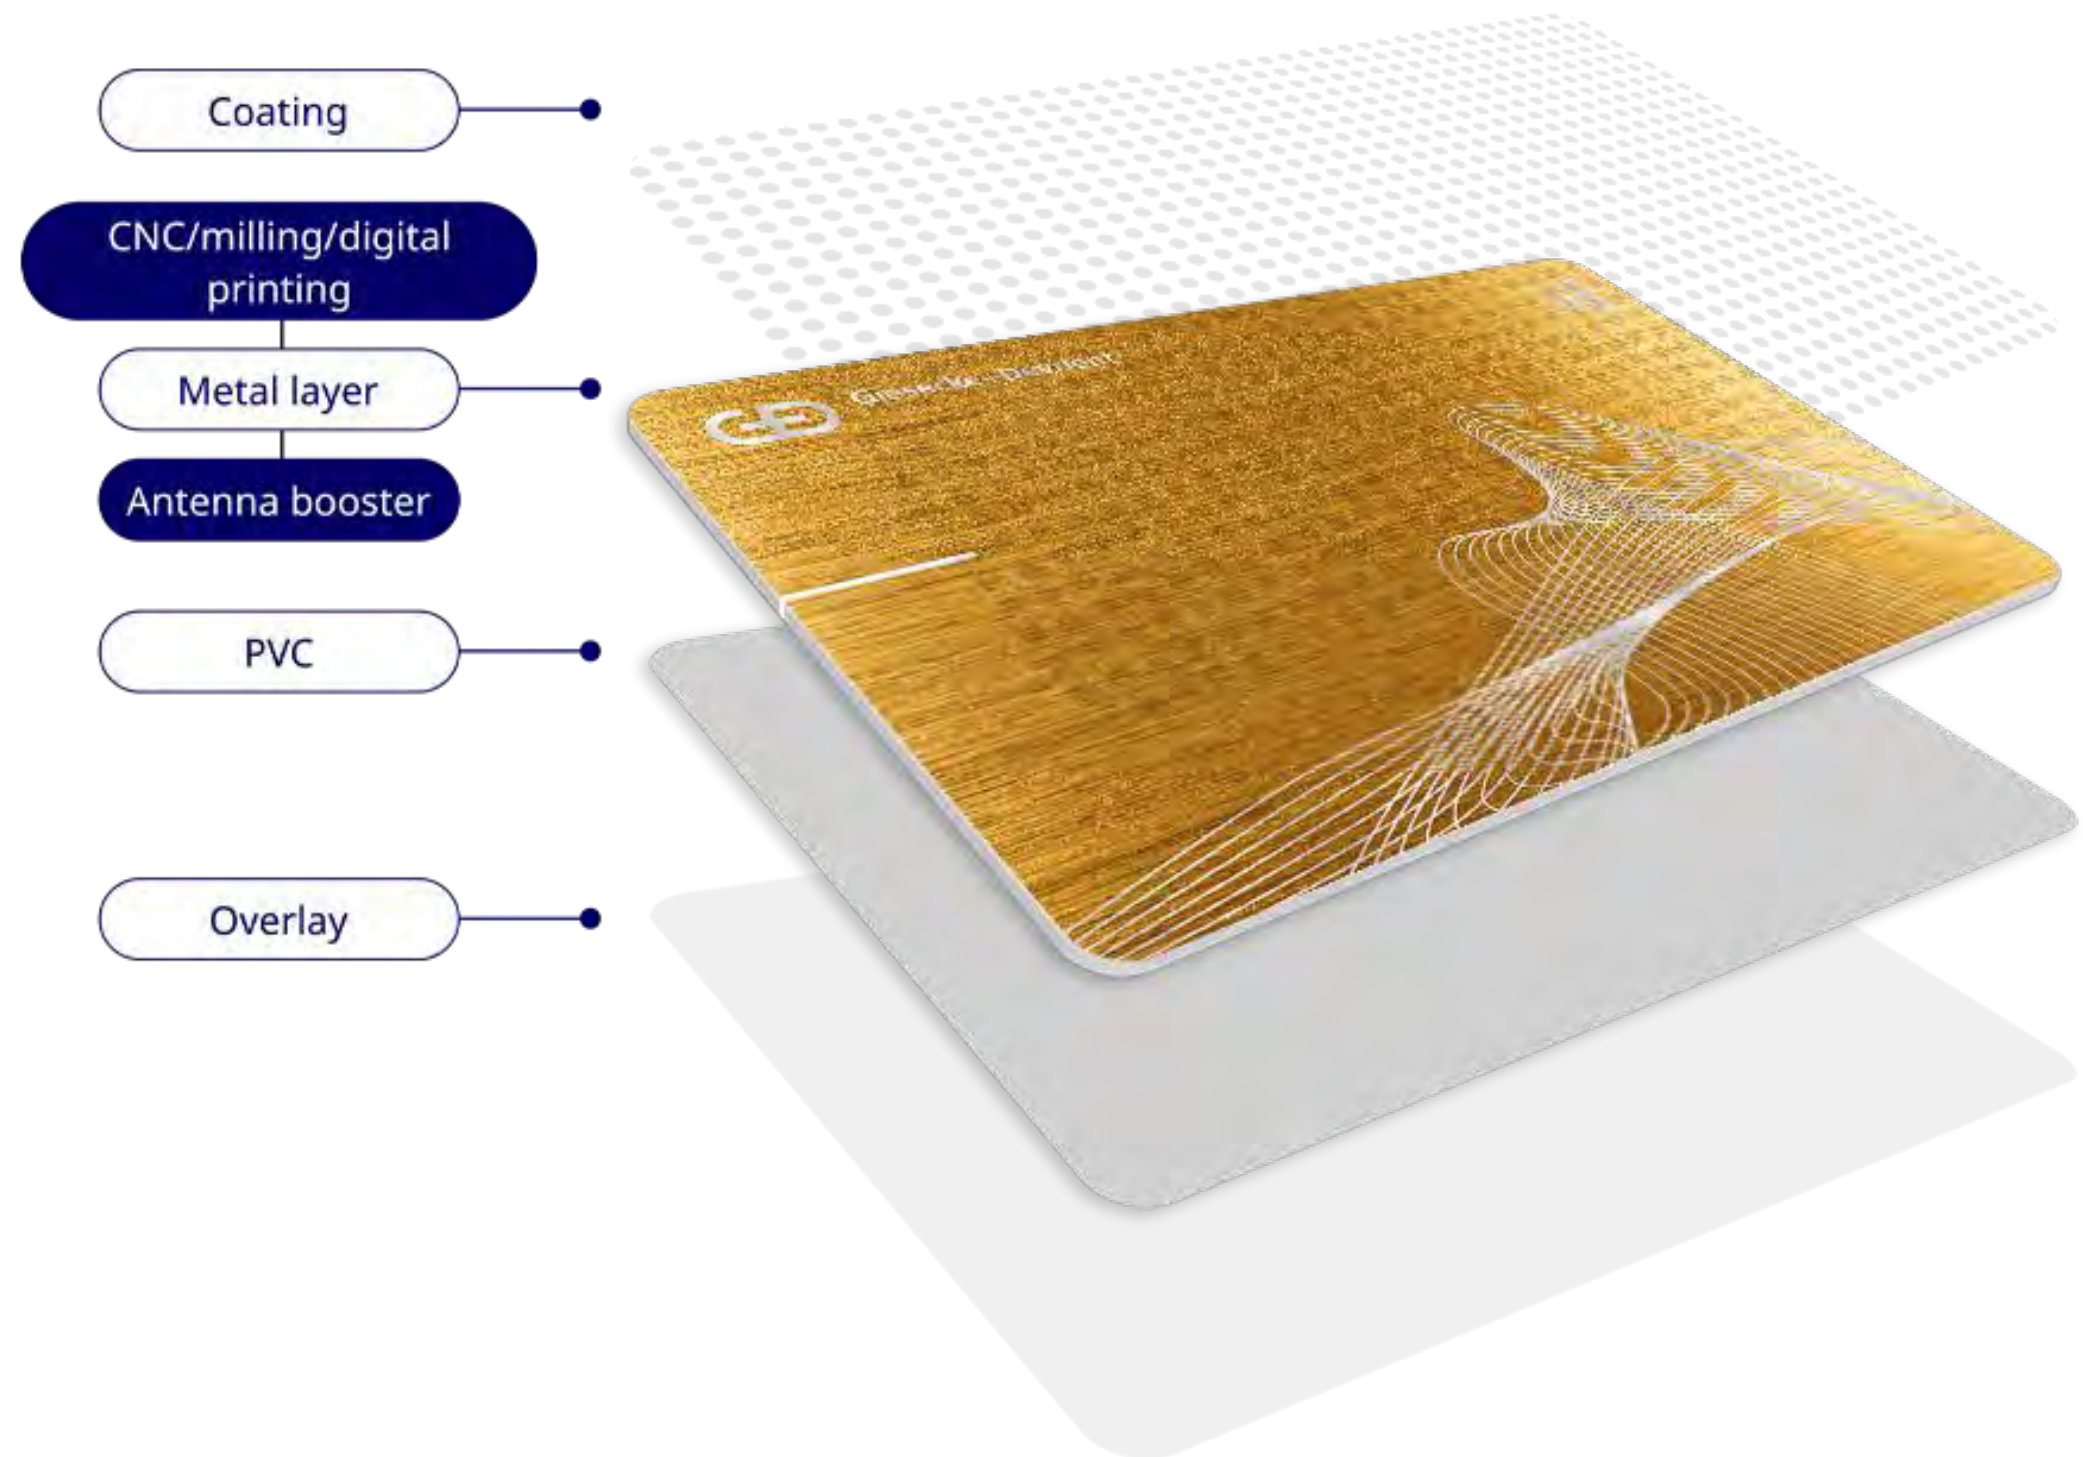

Heavier **18 g** stainless steel creates a sense of permanence, with creative designs lasting longer without fading. Metal Face Lite will convey the owner's values for years to come.

CONVEG
METAL
FACE LITE

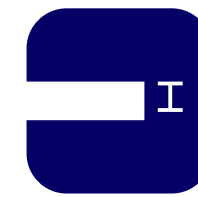

02 ABOUT METAL FACE LITE

Their payment card is an expression of the personality of anyone who aspires to make their mark on society. This **18 g card** is coated on one side, with a PVC finish on the other, with a genuine metal feel along the edges and surface. It is cool to the touch with a distinctive metallic sound with every tap.

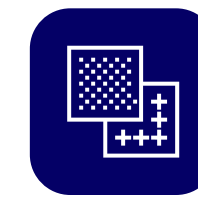

03 DESIGN AND PERSONALISATION

With an enhanced range of customisation options, ranging from CNC and laser engraved logos and digital printing, unleashing a wealth of design effects, Metal Face Lite is for the creative-thinker and designer who believes that the power of aesthetics can leave a long-lasting mark on society.

01 ALL ABOUT YOUR PERFORMANCE

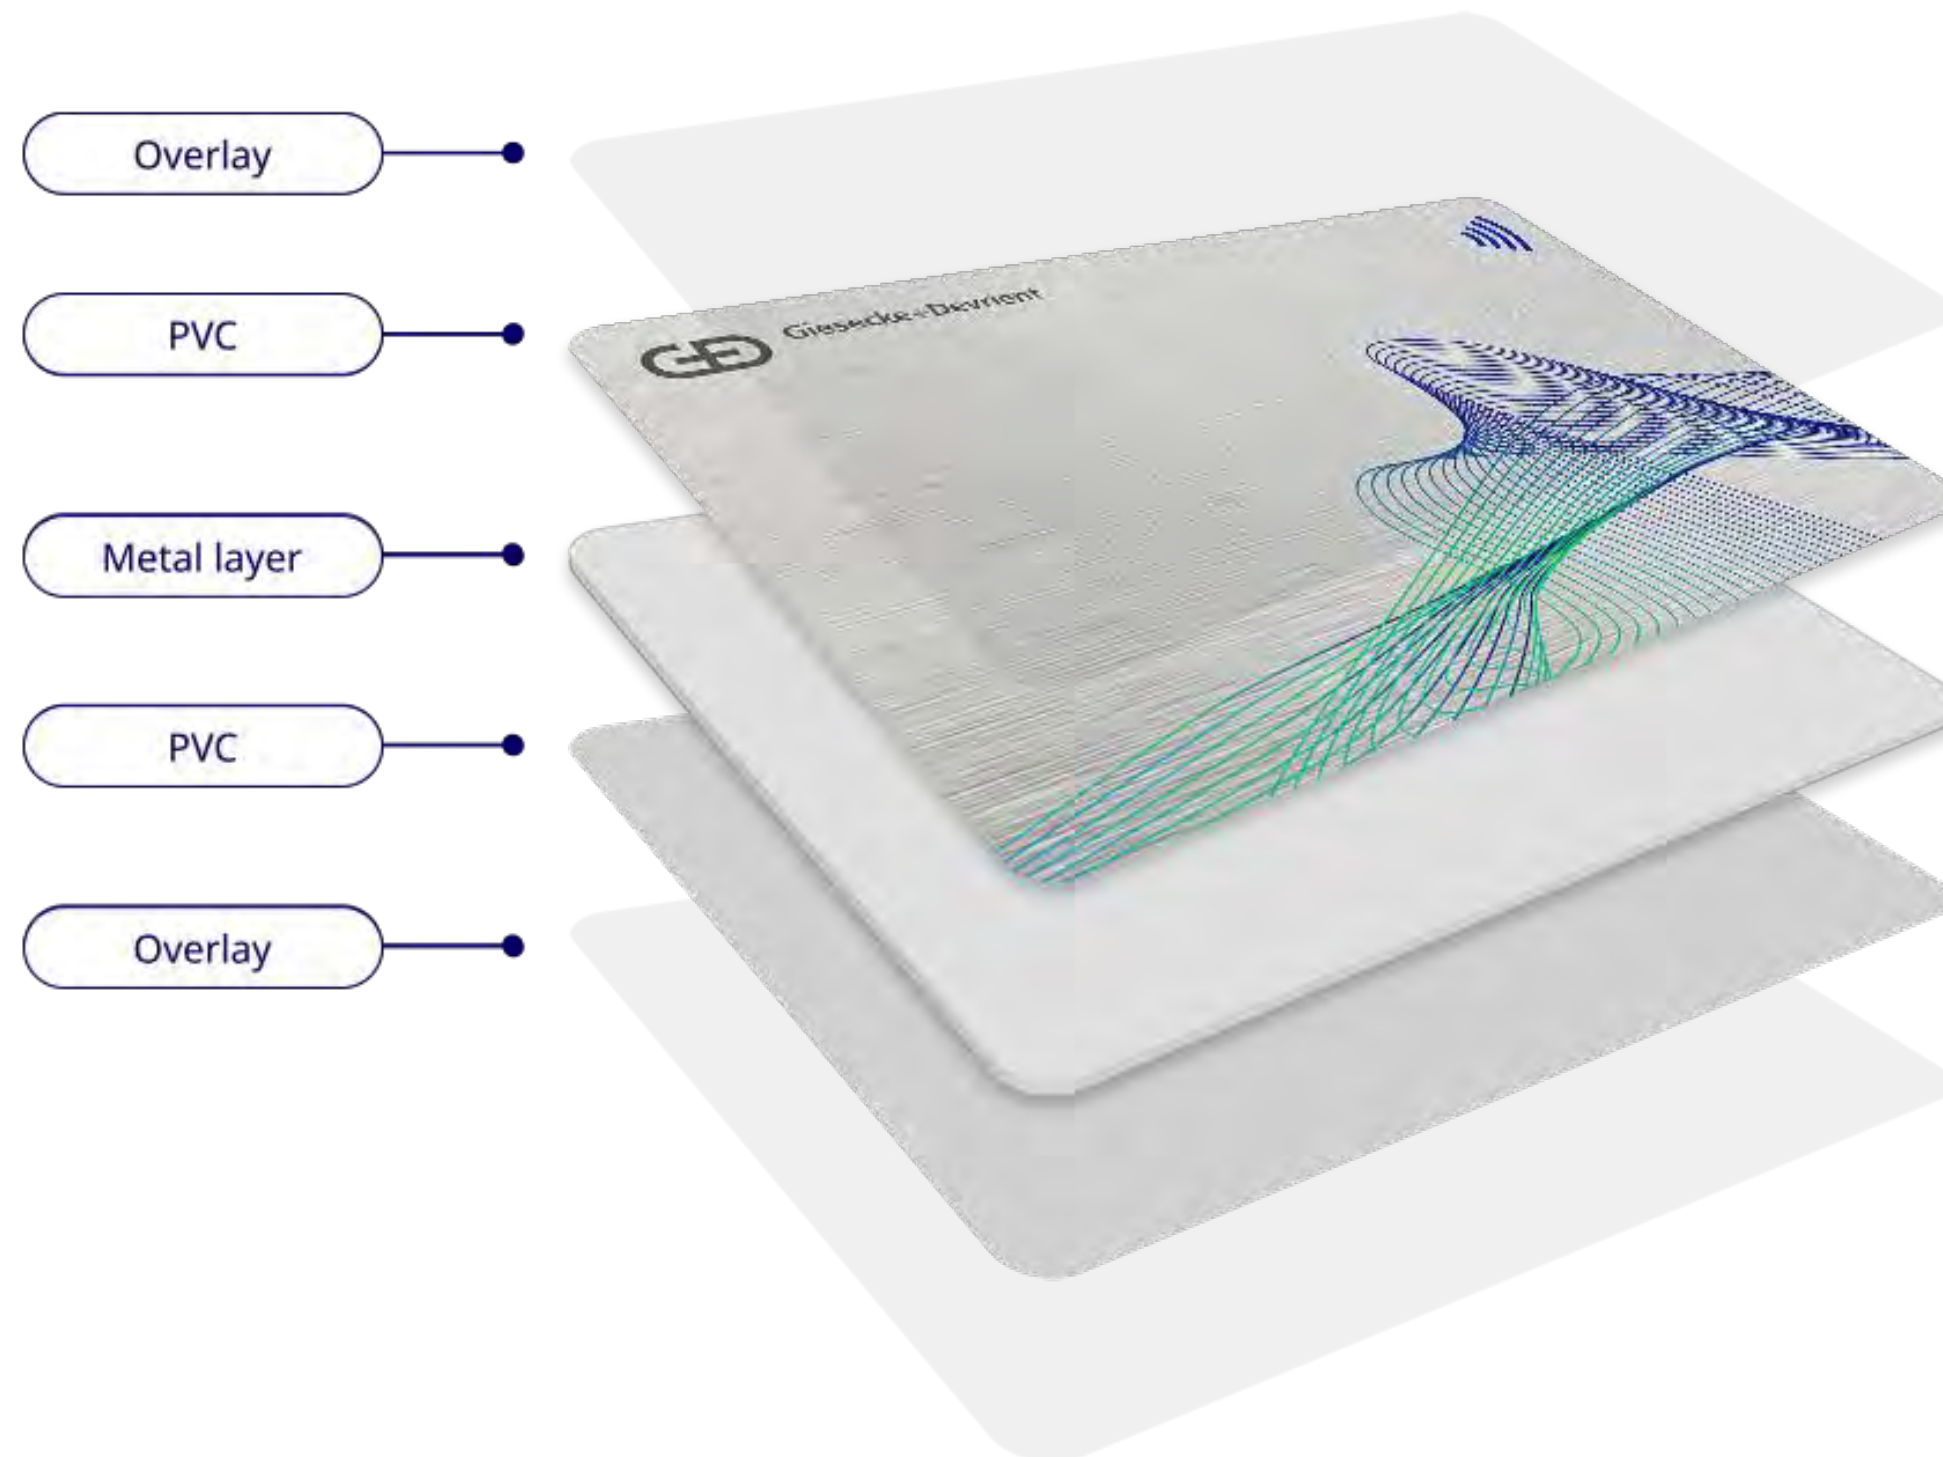

14 g stainless steel - high- end performance with a mass affluent appeal - exudes quality and durability at a competitive cost for the issuer.

CONVEG
METAL
CORE

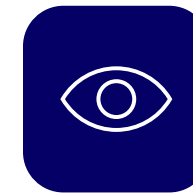

02 ABOUT METAL CORE

Anyone who dares to explore their limits and seek new experiences requires mental resilience and physical toughness. In response to this, this **14 g** stainless steel core lets you feel the quality of the card, and the PVC layers offer protection and a wealth of printing options to make it truly unique.

03 DESIGN AND PERSONALISATION

Customisable "down to the metal", with printing and cut-out options on the steel itself. A top PVC layer provides for all the colour and image options of a conventional plastic card, combining the best of mass market cards with the exclusivity of a more discerning target group.

01 THE ULTIMATE COMPETITIVE CARD

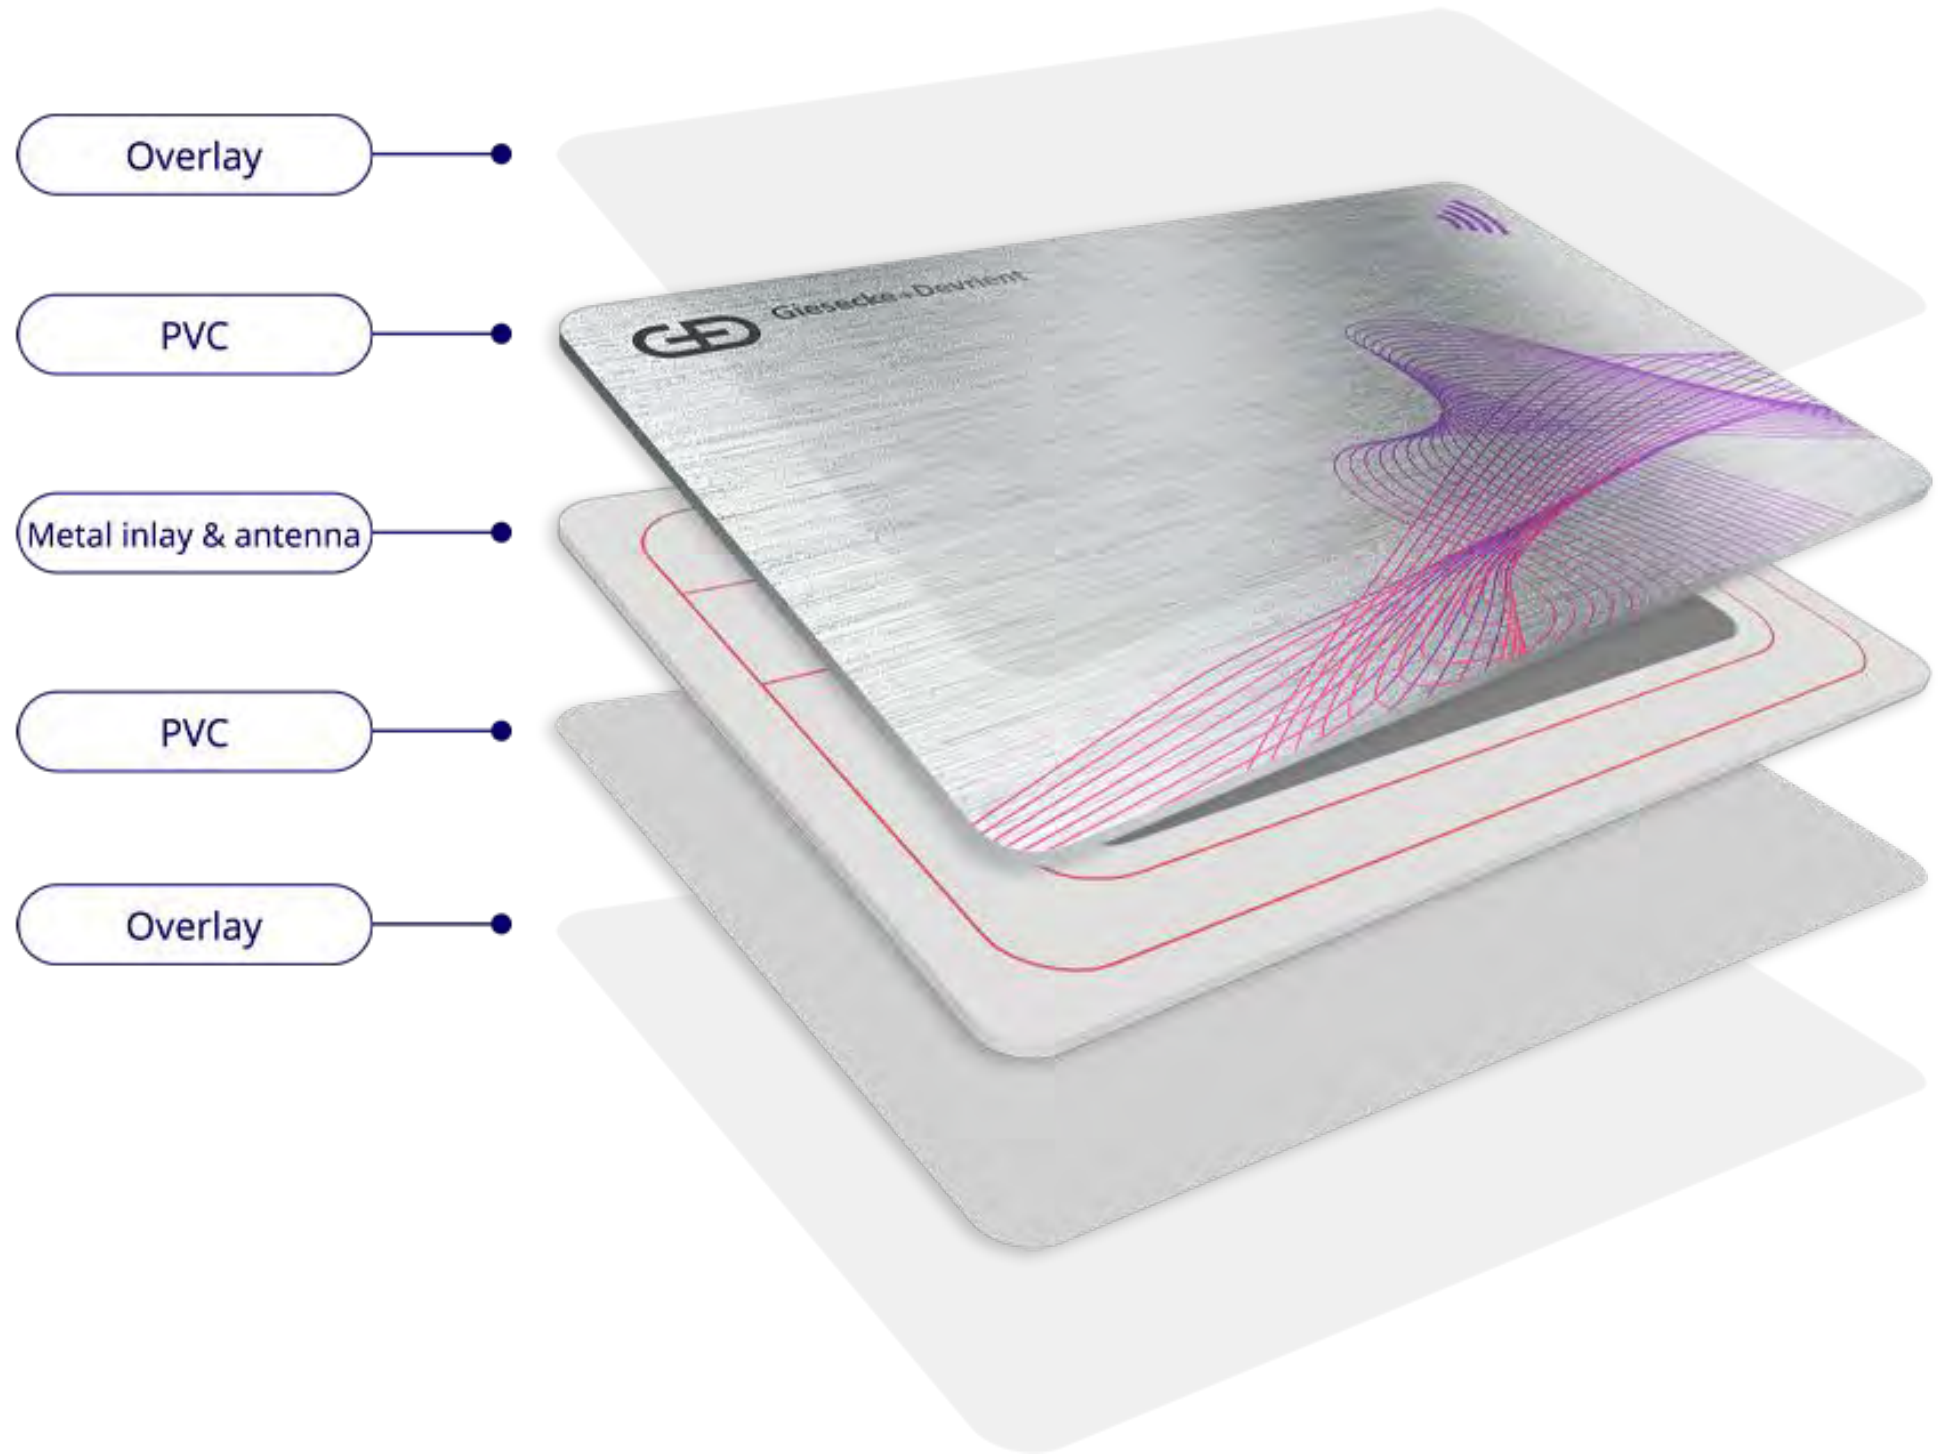

Millennial generations are more comfortable with cool, new and innovative forms. Metal Encased enables issuers to offer them a prestige metal card at an affordable price, forging the relationship with them in the first stages of their careers.

CONVEG
METAL
ENCASED

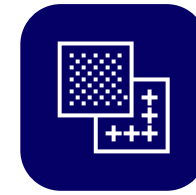

02 ABOUT METAL ENCASED

10 g stainless steel or 17 g tungsten metal inlays offer a satisfying weight at a price point suitable for aspirational millennials. The structure provides for greater creativity using the most standard printing techniques - similar to standard PVC cards (images, gradients, writing, and more).

03 DESIGN AND PERSONALISATION

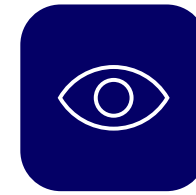

Convego[®] Metal Encased offers a range of customisation and personalisation options to bring the precise benefits of your loyalty or relationship card brand to life (weight, tactile texture, graphical options and features...).

RPVC

01

THE FEEL-GOOD PETROLEUM-FREE CARD

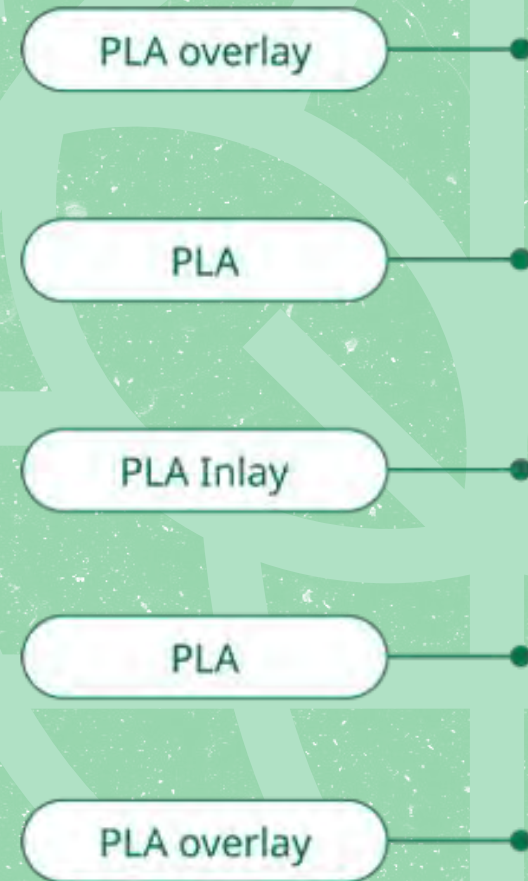

The revolutionary Convego[®] Natural card is made from polylactic acid (PLA) – a compostable bio-plastic manufactured from renewable plant sources that is completely petroleum-free.

CONVEGO NATURAL CARD

02 ABOUT THE NATURAL CARD

Convego[®] Natural is the unique 100% PLA card on the market, designed to appeal to purpose-driven, eco-sensitive end users who want to embrace a new approach to combating the use of plastic.

03 DESIGN AND PERSONALISATION

Less is more. We encourage customers to adopt eco-conscious designs to reduce their carbon footprint. Embedding eco-innovation into your operations and product portfolio strategy will enhance your credibility and reputation in the industry.

No toxic emissions when incinerated

70% CO₂ reduction (compared to petrol-based plastics)

65% lower energy consumption

OCEAN

01 TURNING PLASTIC WASTE INTO A SYMBOL OF CHANGE

Convego[®] Parley Ocean is a lifestyle card made of plastic collected from the oceans and coastal regions by our environmental partner Parley for the Oceans[®].

02 ABOUT PARLEY OCEAN

The ocean plastic card body consists of 100% recycled layers. Each layer has a minimum of 80% recycled content. The card contains a minimum of 75% ocean plastic collected from coastal environments. Mono-material layers are easier to recycle than composite card bodies, which makes our product unique in the market.
